

Collaboration Conversations

What is covered in Collaboration Conversations?

- Understand the value of different thinking styles and learn how to compensate for missing thinking styles in your team by working effectively with others.
- Recognise the diversity available in teams and allow people to play to their strengths
- Listen to the concerns of others and incorporate their concerns and hopes into your solutions

THE
LEADING
CONVERSATIONS
SERIES

Who is it for?

This learning module is for anyone (leader or team member) who wants to use an engaging style of interaction with others resulting in better collaboration. Collaboration techniques allow groups to achieve win-win outcomes and appreciate the value of diverse approaches to solving business challenges.

What does it offer?

This 90-minute module introduces attendees to useful frameworks and practical techniques for engaging others in collaborative approaches. It focuses on dissolving polarities and reducing binary thinking about how problems can be solved. The characteristics of effective collaboration are explored along with ways we can actively listen to the needs and concerns of others and blend these needs into the solutions we create.
