

# Onboarding Conversations

## What is covered in Onboarding Conversations?

- Understand how to connect the work of new-starters to the organisational vision and purpose.
- Show people how they add value to the customer and other team members and how their work can bring meaning and purpose to their lives.
- Establish useful practices to keep new-starters engaged and clear about their first 100 days in their roles.

---

## Who is it for?

This module guides leaders with the key conversations that support team members through the onboarding process. Conversation guides for Day 1 and other key onboarding conversations through the probation period are provided.

---

## What does it offer?

Research tells us that leaders who engage with new team members set people up for success. All future conversations with team members will be impacted by the onboarding experience we establish with our new recruits. Using an authentic approach and following the steps provided in this module will help leaders feel confident about the relationships they are forming with their new team members.
